### WS 702 VEA

Order no. 259.385

#### Advantages at a glance

#### The FLEX Giraffe®: the long-neck solution for sanding and polishing

The long-neck sander from FLEX has revolutionised drywall construction and surface preparation before wallpapering or plastering. Three-metre high ceilings and surfaces can be reached without ladders or scaffolding. The dust nuisance when working overhead and also the clean-up costs are reduced to a minimum, because the patented dust extraction system does a thorough job. The articulated sanding head and padded backing pad combine to ensure a neat finish, with no scratching or grooving. The optimal weight distribution between the sanding head at the front and motor at the back enables continuous use over long periods. And with FLEX sanding discs, the application range is virtually unlimited. In addition to drywall construction and renovation the Giraffe® is used in vehicle, wagon, container, and ship building.
